

Medical Certificate

Name: JOE BLOGGS

Sample Date 20 Sep 2020

Reference: 2485

Date of Birth: 1 Jan 1980

Report Date: 20 Sep 2020

SARS CoV-2 (COVID-19) RNA: Negative

Test details: The COVID-19 RT PCR (polymerase chain reaction) swab test is used to detect the direct presence of SAR-COV-2. It tests for fragments of COVID-19 RNA on the swab using a CE marked test. Sampling and analysis of the test are conducted in line with ISO 15189 quality standards, at a certified laboratory.

Reporting Laboratory: The Doctors Laboratory (<https://www.tdlpathology.com/>)

Internal quality assurance is achieved by strict adherence to standard operating procedures for all analytical processes. The U.K. Accreditation Service (UKAS) provides accreditation to the internationally recognised ISO 15189 Medical Laboratories: Requirements for Quality and Competence standard. Results are subjected to strict internal and external quality control.

I certify JOE BLOGGS tested for COVID-19 using the self-collection swab. The sample was analysed in an accredited lab on 20 Sep 2020. The presence of COVID-19 was **Negative**.
